Numerous buildings have been erected upon this principle, of 15 to 20 stories, and sometimes exceeding 250 feet in height, which are mainly dependent for their stability upon the combination of columns and girders which form the "skeleton" framework, the exterior walling being frequently merely a veneer of terra cotta, brickwork, or stonework, anchored to, and carried by, the metallic framework. 1876 *VOYSE & STEVENSON: Military Dict. v. Skeleton*, *Skeleton drill, which is a method of instructing officers and non-commissioned officers in drill, when a sufficient number of men cannot be collected to form a battalion in single rank. 1897 *HARRY WELT-BETOW* III, v. Stagger, sb.1 Add: 1. c. In a biplane, a condition in which the entering edge of one plane is in advance of the entering edge of the other; also, the extent to which one is ahead of the other.

The stagger is sometimes said to be positive when the upper plane is in advance of the lower.

1915 DOMMETT *Aeroplanes & Airships* 104 When the wings of a biplane are set with the upper one slightly ahead of, or abaft of the other, they are said to be staggered. The stagger is measured by the angle made by the line joining the leading edges with the normal to the fore and aft axis of the aeroplane. It is convenient to call the stagger positive if the upper wing is ahead of the lower. 1916 H. BARBER *Aeroplane Speaks* 62 In the case of a biplane having no stagger, there will be 'interference' and consequent loss of efficiency unless the gap between the top and bottom surfaces is equal to not less than 1½ times the chord. 1928 C. Biplanes with the upper surface set ahead of the lower, have been built to secure the supposed advantage of locating the two surfaces directly above one another, not in apparent aspect, but within the actual flow of the air streams, which approach with a rising trend. 1915 DOMMETT *Aeroplanes & Airships* 25 Biplanes are not so efficient in 'lifting' properties as monoplanes of the same wing area, owing to the wind streams being interfered with, but this defect can be reduced by 'staggering', that is, placing the upper plane slightly forward of the lower plane. 1916 H. BARBER *Aeroplane Speaks* 63 By staggering the top surface forward... it is removed from the action of the lower surface and engages

undisturbed air. 1920 *Motor Cycle* 20 May 562/2 The side-car accommodates two passengers in staggered seats.

Chess-men. See MAN sb.¹ below.

Clead, cleed, v. *Etymology.* Omit the eighth line, and substitute: f. *clādī* sb.: see CLOTH.

Coincide and its derivatives are treated in a scholarly monograph by H. E. Shepherd, in the *American Journal of Philology*, vol. I. pp. 271-280, in which the history of the words in the mediæval Latin of Roger Bacon and the English writers of the 17th c. is traced with much fullness. For the verb, in sense 3, earlier instances are given from BERKELEY (1705) *Works* 1871 IV. 442, and W. WOLLASTON (1709) in *Nichols Illustr. Lit. Hist.* I. 201.

Corduroy. Earlier example of the form *corderoy*:—*Chadwick's Patent*, No. 1093, of 1774, specifies *inter alia*, 'cotton corderoys, cotton and linen cordcroys'.

Cowl, sb.² Prof. Skeat points out the OE. form *cufel*, pl. *cufas*, of date 963-84, in *Cartul. Saxon.* (ed. Birch) 367, 'ii cufas & þy trogas' [two cows and three troughs]. This makes certain its relationship to OHG. *chubil*, whether originally Teutonic, or of West German adoption from Latin.

Daver, v. dial. [In I. app. cognate with Du. *daveren* to shake, quake, MLG., LG. *dawern*, a word of frequentative form, of which the root is uncertain. In II. perh. transferred from the same.]

VII* (1896) 23 About the hringing of the same ship into her dokke. 1488 *Ibid.* 26 Keping the said Ship at Erith in her dokke. 1495 *Ibid.* 137 The Reparalyng, fortifying, and amcndyng the dokke for the Kyuges shippes at Portsmouth, makyng of the gates, & fortifying the hede of the same dokke. *Dock-head*: 1497 *Ibid.* 143 The dokke, the dokke hedde & gates of the same.

Eve-star. The quotation 1691 under this word should be deleted. The word *euester* occurring there is adapted from the mod. Lat. *euestrum*, which seems to have been arbitrarily invented by Paracelsus, and is explained in the *Onomasticon* of Toxites (1574) to mean, amongst other things, 'the astral body [*corpus sidereum*] of man, which foretells to us either death or any other evil'.

Eyelet-hole, sb. 1. Earlier example:—1497 *Naval Accts. Hen. VII* (1896) 334 Makyng of olyett-hooles with other necessities for the seid sayles.

Fastgong, Fastingong. The ON. forms *festugangr*, *festu-ningangr*, should have been referred to. From the latter it appears that the correct analysis of *fastingong* is *fast* sb. + *ingang*.

For, prep. 7 c. The expression 'to name (a child) for (= after) a person' is erroneously marked 'now only U.S.'. It is still current in Sc.

Foy, v. Mr. G. H. Haswell informs us that on the north-east coast (esp. at Shields), a *foy-boat* was a small hoat used (before the introduction of steam-tugs) to tow vessels in and out of harbour. The boat carried a small anchor or 'kedge', and was rowed a certain distance ahead of the vessel being towed; the kedge was then dropped, and the men on the ship 'hove upon' the kedge with a windlass until the vessel came over it, when the kedge was taken up and the process repeated. The operation was called *foying*, and the men employed *foy-men*. (See *The Maister: a Century of Tyneside Life*, p. 39.)

Gabion 2. The source of Scott's peculiar use of the word is found in the following quotations, but it does not appear what suggested the 'catachrestic' application:—1638 ADAMSON *Muses Threnodie* [no paging or signature] note, The ornaments of his Cabin, which by a Catachrestic name, he usually calleth *Gabions*. *Ibid.* (*title of piece*), Inventarie of the *Gabions*, in M. -lock, suffix, in mod. Eng. occurring only in *wedlock*, represents OE. *-lde*, the second element of numerous compounds (usually neuter: rarely masc.) in which the first element is a sb. OE. had about a dozen of these compounds (those in which *-lde* means 'offering', LAKE *sb.*¹, are not counted); in all these the second element may be rendered 'actions or proceedings, practice', as *brýðlde* nuptials, *beadolde*, *feohlde*, *heabold* warfare, *hæmedlde*, *wiflde* carnal intercourse, *raðslde* robbery, *wedlde* pledge-giving, also espousals, nuptials, *witlde* punishment, *worðlde* calumny. The *-lde* of these compounds should probably be identified with *lde* play, sport, LAKE *sb.*²; the words meaning 'warfare', which may have been the earliest examples of this use, may be compared with the synonymous compounds in *-plega* play. Of the OE. compounds of *lde* three (*brýðlde*, *feohlde*, *raðslde*) survived into early ME., and *wedlde* still survives with altered meaning. In ME. the suffix was sometimes assimilated in form to the etymologically equivalent but functionally distinct Scandinavian *-laik*. A few examples, not recorded in OE., appear in early ME.: *dweomerlak* (DEMERLAYK), FERLAC, SHENDLAC, *treulac*, *wohlac* (cf. WOHLECHE), the last from a vb-stem, *wop-* to woo; but none of these survived later than the 14th century.

Long standing. The origin of this phrase seems to be illustrated by the following passage:—a 1568 ASCHAM *Scholem.* i. (Arb.) 34 Except a very fewe, to whom peradventure blood and happie parentage, may perchance purchase a long standing vpon the stage.

Elsewhere the word survives only as the name of the Angola 'penny' piece or its value. Mr. Bentley says that it is derived from a Congo verb *kuta* to tie, now obsolete, but preserved in the reversing form *kutulula* to untie.

Pagan. *Etymology*. The explanation of L. *pāgānus* in the sense 'non-Christian, heathen', as arising out of that of 'villager, rustic', given by Orosius (a Spaniard) c 417, has been shown to be chronologically and historically untenable, for this use of the word goes back to Tertullian c 202, when paganism was still the public and dominant religion, and even appears, according to Lanciani, in an epitaph of the 2nd cent. The explanation is now found in the L. use of *pāgānus* as = 'civilian, non-militant', opposed to *miles* 'soldier, one of the army'. The Christians called themselves *militēs* 'enrolled soldiers' of Christ, members of his militant church, and applied to non-Christians the term applied by soldiers to all who were 'not enrolled in the army'. Cf. Tertullian *De Corona Militis* xi, 'Apud hunc [Christum] tam miles est paganus fidelis quam paganus est miles infidelis'. See also GIBBON xxi. *note*..

A LIST OF BOOKS QUOTED IN THE
OXFORD ENGLISH DICTIONARY

NOTE

THIS List, which has been compiled by two members of the editorial staff of the *Oxford English Dictionary*, Mr. F. J. Sweatman and Mr. H. J. Bayliss, comprises the titles of such works as have been most commonly quoted in the Dictionary. While it has no claim to be regarded as a complete guide to English literature, it will be found to contain a large proportion of the more important works, together with many others less familiar; it includes a large number of titles of periodical publications.

The arrangement is according to the alphabetical order of authors' names or titles of works. Following each title is the date of the first edition, or of composition (ascertained or inferred), printed in thick type. Where it is possible or necessary to give only a limiting date, such as that of an author's death, or of a manuscript in which the work is extant, this is preceded by *a* (= *ante*); e. g. *BACON Works a 1626*, *King Horn a 1300*. As occasion requires, the dates of editions used other than the first, or the names of editors or of series of publications, are added in ordinary type within round brackets. Where a title (e. g. Arnolde's *Chronicle*) is followed by a second title in brackets, the first is that by which the work is generally known, the second is its proper title. Round brackets are also occasionally used to indicate that works are questionably assigned to the authors under whom they are entered.

It is to be observed that the dates assigned (in the early years of the history of the Dictionary) to some Middle English texts and to a few books of later date (e. g. the plays of Shakespeare), as also certain ascriptions of authorship, have been modified by subsequent research (the resulting discrepancies rarely affect in any serious degree the chronology of words and senses).
